EXPLORER® Classic

Additional Product Info*

The MagniSight Explorer is a true American classic. Building upon the success of earlier models, it was introduced in 2001 and quickly became our best selling product. Featuring a high resolution auto focus camera, simplified controls, optional upgrades, and protected by a 3 year manufacturers warranty. With lower pricing, the Explorer Classic models are a true VALUE.

Magnification Range

- 3.0x to 57x (19" Model)
- 3.5x to 65x (22" Model)

Adjustable Contrast Control

Whether you are viewing laser printed pages, low contrast newsprint, or a brightly colored photograph, the variable contrast control is a rotary control providing the user the ability to find the optimal setting for their vision.

Viewing Table

The Viewing Table is equipped with front-to-back and side-to-side (XY) slides that allow the user to position materials under the camera unit for reading, writing, and viewing various items. The table can be locked with an easy one-lever brake feature.

Optional Features

- **Select-A-Color Option (S)**
In addition to the standard Full Color, B&W, and reversed B&W modes, the Select-A-Color option adds three additional 2-color modes (Yellow on Blue, Yellow on Black, & Green on Black) which are ideal for some eye conditions.
- **Line / Windowing Option (L)**
The Line function superimposes a reference line on screen which is ideal for writing. The line position is adjustable and can be moved off screen when not in use. The Windowing function creates an adjustable shadowed area on the screen which aids in isolating a row of text when reading.

About Our Company

Founded in 1990, MagniSight is the longest running manufacturer of video magnifiers (CCTV's) for the visually impaired in the United States. Our products are assembled in Colorado Springs, Colorado and are sold throughout the U.S. and overseas to both individuals and agencies. One of our proudest achievements was supplying America's visually impaired veterans with our products for many years under the National V.A. contract.

Along with our own line of desktop CCTV's, we are also a distributor of high quality portable CCTV's.

A Message From Our President, Brian Smith

When I founded MagniSight, my goal was to manufacture equipment that would really make a difference in the lives of visually impaired people. This was especially important to me since, at an early age, I myself was diagnosed with a juvenile form of Macular Degeneration. Today, MagniSight continues to fulfill that goal by **combining a unique understanding of low vision with the latest technology.**
